Managing Office 365 Identities and Services

20346B

Delivery Type: Classroom
Duration: 5 days

Overview:

This is a 5-day Instructor Led Training (ILT) course that targets the needs of IT professionals who take part in evaluating, planning, deploying, and operating Office 365 services, including its identities, dependencies, requirements, and supporting technologies. This course focuses on skills required to set up an Office 365 tenant, including federation with existing user identities, and skills required to sustain an Office 365 tenant and users. This course maps to the following two certification exams: 70-346 and 70-347.

Windows Azure and Office 365 are required or used as part of the lab for this course, which may not be available in all countries. Please check with your

Microsoft training provider that these cloud services are available in your area. Training Providers please reference the course setup guide for more details.

Audience Profile:

This course is intended for IT professionals and consultants who take part in evaluating, planning, deploying, and operating the Office 365 services, including its dependencies, requirements, and supporting technologies. This course is also intended for network administrators and IT managers responsible for managing and maintaining Office 365, including identities, document protection, integration with on-premise directory services, and compliance with service level agreements.
