Accelerated HP A & E-Series Networking Technologies, Rev 11.3

00339356

Delivery Type: Classroom
Duration: 5 days

Overview

The Accelerated HP A & E-Series Networking Technologies training is a 5-day course combining the HP A-Series Networking Technologies and HP E-Series Networking Technologies courses. This accelerated training introduces network technicians to the technologies and products in the HP A-Series line of routers and switches. The Accelerated HP A & E-Series Networking Technologies training also introduces network technicians to the HP E-Series switches, wireless access points, and controllers and the technologies they need to understand to begin configuring and managing these products. The course also introduces IPv6 and HP ProCurve Manager Plus (PCM+), the network management platform for the E-Series products. This course prepares new candidates and candidates who hold an older HP ProCurve AIS or a 3rd party network vendor certification of equal level for the Accredited Integration Specialist (AIS) 2011 certification within the HP ExpertONE program. For more information, visit the HP networking web site,www.hp.com/networking/training.

This course is the equivalent to HL042S.

Target Audience

Professionals who deploy SMB solutions based on HP technologies, including HP Reseller Systems Engineers, Customer IT Staff, HP System Engineers and HP Services Field & Call Center Support Engineers.

Objectives

- ✓ After completing this course, you should be able to:-
- ✓ Configure Layer 2 technologies such as STP, Link Aggregation and VLANs on HP A & E-Series switches.
- ✓ Configure IRF on HP A -Series switches.
- ✓ Managing and Monitoring SMB Networks with HP PCM network management software.
- ✓ Perform basic configuration and switch setup on HP A & E-Series switches.
- ✓ Configure basic IP Routing like static routing and RIP on HP A & E-Series switches.
- ✓ Provide Mobility solutions to SMBs with the E-Series wireless products.
