Integrating and Managing HP BladeSystem Solutions
192618

Delivery Type: Classroom
Duration: 5 days

Overview

Integrating and Managing HP BladeSystem Solutions, Rev 10.31 is a comprehensive course that delivers the technical information necessary to successfully manage and integrate HP BladeSystem components including interconnect modules, partner blades, and management devices. Students will also install multiple operating systems using deployment tools and use HP management software including virtual machine management functionality and server migration functionality of Insight Software.

Target Audience

This course is suitable for Technical Integration Specialists.

Certification

The Integrating and Managing HP BladeSystem Solutions, Rev 10.31 training prepares the participant for the high-stakes exam (HP0-S28), which measures the participant's technical understanding of HP products.
