

Avaya Aura® Contact Center Administration 3609C

Duration: 5 days

Overview

In this course, you learn how to access Contact Center Manager Administration (CCMA), configure Threshold Classes, Call Presentation Classes, Skillsets, Call Center Agents, and Call Center Supervisors. You will learn how to configure Administrators through the multiple components of Access and Partition Management and how to bulk load data into the CCMA using the Configuration Tool. You will examine the switch interface and the acquisition of resources. You will discover different methods of system management, including viewing, creating, and modifying tabular and graphical real-time displays and interpreting, viewing, modifying, and scheduling standard and user-defined historical reports.

Pre-Requisites

Attendees should meet the following prerequisites:

- ✓ Attendance at the following Avaya courses
- ✓ Communication Server 1000 6.0 System Administration and Management (0777)
- ✓ ACD A-C2 Feature Administration Nortel
