

IBM Sterling Selling and Fulfillment Suite Participant Modeling

6T800G

Delivery Type: Instructor led- Online

Duration: 2 days

Overview

This 2-day instructor-led course provides you with an understanding of the configurations that are required to map all participants in a supply chain to the corresponding roles in IBM® Sterling Selling and Fulfillment Foundation. This course is primarily designed for Hub and Enterprise administrators.

This course begins with an overview of Sterling Selling and Fulfillment Foundation and a brief introduction of its business models. The course then describes how to define Participants and create Organizations and users. Through a combination of procedural information and exercises, you will learn about topics such as how to assign attributes to the different roles defined in Sterling Selling and Fulfillment Foundation and configure user access policies.

Pre-Requisites

You should have completed:

- ✓ Supply Chain Concepts (Online Tutorial)

Objectives

- ✓ Map the participant details to their appropriate Roles using Application Platform.
- ✓ Create Users and Configure user security features using Application Platform.

Target Audience

This course is to train Hub and Enterprise administrative users to map the participants in a supply chain to their appropriate roles in Sterling Selling and Fulfillment Foundation.
