

Advanced ScrumMaster Skills

ASM1

Delivery Type: Classroom

Duration: 1 day

Overview

The ScrumMaster performs a vital role within the Scrum framework: coaching the Scrum team including the Product Owner in the use of Stories and other aspects of the approach; ensuring effective team dynamics and cross-functional collaborative working; and enabling the team to focus without distraction from impediments and outside interruptions. An excellent ScrumMaster plays a large part in making an excellent Scrum team.

It is widely recognised that initial Certified ScrumMaster training is just the starting point to becoming a great ScrumMaster. Practical experience of performing the role is necessary, supported by advanced training in specific key aspects of the role. This Advanced ScrumMaster Skills course provides the ScrumMaster with the skills and understanding necessary to move to the next level of performance

Pre-Requisites

Significant Scrum experience essential

Objectives

- ✓ Improve skills in mastering stories
- ✓ Develop deep awareness of facilitating Scrum
- ✓ Develop advanced ScrumMaster leadership skills
- ✓ Understanding Stakeholder management in Scrum

Target Audience

This course will benefit recent Certified ScrumMasters or those with some experience of performing the role who wish to deepen their skills and function in a more distributed or complex Agile environment.
