Avaya Message Networking Implementation
ATI02046A

Duration: 2 days

Overview

This course is designed to provide hands-on practice to perform either implementation, maintenance functions or both. This two-day course provides training in installation and configuration tasks for Avaya Message Networking 5.2. In addition, this course provides opportunities to troubleshoot issues that may arise during the installation process. As needed, you will find resource and other reference material throughout this course.

Objectives

- ✓ Install and set up the S8800 MN server.
- ✓ Plan and create a Message Networking dial plan.
- ✓ Manage dial plan mapping on the MN 5.2.
- ✓ List the different networking protocols supported on MN 5.2 and compare the differences in the protocols.
- ✓ Administer nodes (remote machines) on the Message Networking 5.2 server.
- ✓ Administer and maintain tasks associated with the Message Networking 5.2 server.
- ✓ Troubleshoot common Message Networking errors.
