

IBM Cognos BI Report Studio bootcamp (V10.2)

B5151G

Delivery Type: Classroom

Duration: 5 days

Overview

Note: If you are new to reporting and/or prefer to learn at a more relaxed pace, where there is more time to consolidate as you go along, then we strongly recommend that you book on the individual courses. This course is also not appropriate if you only use relational data.

This IBM Cognos Report Studio (V10.2) Bootcamp is an intensive, five-day course covering all the topics you need to return to the workplace and immediately be able to build sophisticated reports against both relational and dimensional data. Within one week we will cover most of the topics covered on three of our stand-alone courses - IBM Cognos Report Studio: Author Professional Reports Fundamentals (V10.2) (B5258GB), IBM Cognos Report Studio: Author Reports with Multidimensional Data (V10.2) (B5261GB) and IBM Cognos Report Studio: Author Professional Reports Advanced (V10.2) (B5259GB) Separately, these courses add up to seven days of training.

This course is aimed at those who have experience of using relational and dimensional data and have

had exposure to reporting tools - Cognos BI or similar.

As well as serving the purpose of allowing Professional Report Authors to become proficient as quickly as possible, this course is ideal for those not directly involved in reporting, but who still need and understanding of the concepts. For example, BI Modellers.
