

# Cisco Wide-Area Application Services v3.0

## CWAAS

**Delivery Type:** Classroom

**Duration:** 5 days

### Overview

This instructor led course is designed to teach delegates how to design and deploy a solution that improves application performance over the WAN whilst enabling infrastructure consolidation. Delegates will learn to fully appreciate the optimization and application acceleration features of Cisco WAAS enabling them to incorporate these capabilities into their design and integrate with this network. Troubleshooting have been incorporated both theoretically and through hands-on labs.

### Pre-Requisites

Attendees should meet the following prerequisites:

- ✓ Fundamental knowledge of Microsoft Windows networking technologies
- ✓ Fundamental knowledge of WAN optimization
- ✓ Fundamental knowledge of VMware server virtualization technologies
- ✓ CCNA is recommended. ICND1 and ICND2 or CCNABC

### Objectives

After you complete this course you will be able to:

- ✓ Describe the business value of WAN optimization and application acceleration technologies
- ✓ Perform the basic configuration steps that are required for a Cisco WAAS deployment
- ✓ Implement, integrate, and manage Cisco WAAS
- ✓ Configure advanced features of Cisco WAAS
- ✓ Design a Cisco WAAS solution
- ✓ Implement each of the Cisco WAAS application optimizers for maximum performance
- ✓ Troubleshoot a Cisco WAAS solution.

### Target Audience

Individuals involved in the design and deployment of a WAAS solution, or system and field engineers who need to attain the Advanced Routing and Switching Certification.

### Certification

Recommended as preparation for the following exams:

- ✓ 642-655 - WAASFE - Required for the Cisco Routing and Switching Field Specialist Certification
- ✓ 642-654 - WAASSE - Required for the Cisco Routing and Switching Solutions Specialist Certification
