Deploying Cisco WebEx Meeting Server
GKDCWMS

Delivery Type: Classroom
Duration: 1 day

Overview

Cisco WebEx Meetings Server (CWMS) is a highly secure, fully virtualized conferencing solution that combines audio, video, and web conferencing in a single solution. It allows customers to manage their conferencing solution as a capital expenditure instead of an operational expenditure. This course will give attendees opportunity to install, configure and integrate Cisco WebEx Meeting Serverwithin an Active Directory domain, with Cisco Unified Communications Manager and end user client machines.

Pre-Requisites

Attendees should meet the following prerequisites:
✓ Delegates should have attended and passed the following courses, or have the equivalent experience in order to fully benefit from this course.
✓ Cisco Unified Communications Manager Administration (ACUCM)
✓ Implementing Cisco Unified Communications Manager Part 1 and Part 2

Objectives

After you complete this course you will be able to:
✓ Understand WebEx Meeting Server Design Considerations
✓ Deploy Cisco WebEx Meeting Server
✓ Integrate Cisco WebEx Meeting Server with Cisco Unified Communications Manager
✓ Integrate Cisco WebEx Meeting Server with Active Directory.

Target Audience

Unified Communication Engineers involved in the deployment of a Cisco WebEx Meeting Server Solution.

Certification

There is no exam currently aligned to this course.
