Implementing Cisco Jabber v9.0
JABSE

Delivery Type: Classroom
Duration: 1 day

Overview

This course will explore the implementation of the new Jabber Client for Windows. Participants will have a first look opportunity into the pre-configuration of CUCM 9.0 and Windows Active Directory, followed by the new CUCM IM & Presence 9.0 Server installation and its integration with CUCM. Enhanced Directory Integration (EDI), or Cisco User Data Services (UDS) configuration shall be visited to give an understanding of their differences to attendees.

Pre-Requisites

Attendees should meet the following prerequisites:
✓ Attended and passed ACUCM or CIPT1 and CIPT2 or have the equivalent level of knowledge.

Target Audience

Engineers involved in CUCM deployments.

Certification

There is no exam currently aligned to this course.
