

CCIE Routing & Switching Preparation Theory Course v4.0

CCIET

Delivery Type: Classroom

Duration: 5 days

Overview

This instructor led theory course is designed to build upon the knowledge gained from the CCNP or CCIP Certification. This course will refresh and enhance your knowledge focusing on the key areas required in preparation for the CCIE Routing and Switching Theory Exam V3.0.

This latest version of the CCIET course has been revised in line with Cisco's most recently updated Lab Blueprint and now includes coverage of recently untested topics, such as MPLS and IPv6.

Target Audience

This course is aimed at anyone studying for the CCIE Routing & Switching Theory exam.

Pre-Requisites

Delegates are required to meet the following prerequisites:

- ✓ CCNP
- ✓ QoS
- ✓ BGP – Not essential but recommended

Objectives

At the end of this course delegates will be able to;

- ✓ Confidently sit the CCIE Routing & Switching Theory Exam 350-001 V3
- ✓ Detail the theory behind configuring complex Routing and Switching networks
- ✓ Have an enhanced knowledge of Cisco Routing & Switching technology and methodology

Certification

Recommend as preparation for exam(s):
