

CIFS Administration on Data ONTAP®

CIFS

Delivery Type: Classroom

Duration: 2 days

Overview

CIFS Administration on Data ONTAP® is an instructor-led course designed for those who provide support and administration for a CIFS environment on NetApp storage systems running the Data ONTAP operating system. The course covers the different server environments where a storage system can support Windows® client users; the licensing and setting up of CIFS on the storage system; configuring files and options; administering a storage system including creating and managing shares, users, and groups; and troubleshooting CIFS problems.

Pre-Requisites

Data ONTAP Fundamentals or equivalent experience Introduction to Network Appliance™ Products, v4 (WBT)

Objectives

- ✓ Describe the different CIFS environments
- ✓ Identify the appropriate server environment for your storage system to support Windows client users

- ✓ Configure the CIFS environment on a storage system by licensing CIFS
- ✓ Configure files and options on the storage system
- ✓ Administer a storage system in a CIFS environment including creating and managing shares, users, groups, and sessions
- ✓ Understand group policy objects and file blocking
- ✓ Review approaches to harden security for a storage system in a CIFS environment
- ✓ Collect CIFS performance statistics with storage system commands and tools
- ✓ Explain how to troubleshoot basic CIFS problems

Target Audience

For those who provide support and administration for a CIFS environment on NetApp storage systems running the Data ONTAP operating system
