

Cisco Unified Presence Integration 7.0 v7.0

CUPI

Delivery Type: Classroom

Duration: 2 days

Overview

Cisco Unified Presence Integration (CUPI) v7.0 is a 2-Day course that prepares you for integrating and configuring Cisco Unified Presence 7.0. It includes the integration options with other Cisco Unified Communication products as well as the new plug-in to connect the Microsoft Office Communicator directly with the Cisco Unified Communications solution.

The course includes lab parts where the learners can use their gained knowledge.

Target Audience

The course is recommended for Network and System Engineers who are responsible for designing and configuring Cisco Unified Presence solutions.

Pre-Requisites

Delegates should meet the following prerequisites:

- ✓ CCVP certification or equivalent knowledge

Objectives

After completing this program, you will be able to:

- ✓ Explain the presence technology and solution
- ✓ Design Cisco Unified Presence deployment solutions
- ✓ Describe Cisco Unified Presence interoperability and integration options
- ✓ Configure the Cisco Unified Communications Manager for the integration with Cisco Unified Presence
- ✓ Configure Cisco Unified Presence to integrate with the Cisco Unified Communications Manager and with other Cisco Unified Communications products
- ✓ Integrate the Microsoft Office Communicator via Cisco UC Integration for Microsoft Office Communicator(CUCiMOC)
