

Cisco Unified Presence Presales & Design 7.0 v7.0

CUPPD

Delivery Type: Classroom

Duration: 1 day

Overview

Cisco Unified Presence Presales and Design (CUPPD) v7.0 is a 1-Day course that prepares you for designing Cisco Unified Presence 7.0. It also includes integration options with other Cisco Unified Communication products as well as third-party presence solutions, including Microsoft Live Communication Server, Microsoft Office Communications Server and IBM Lotus Sametime.

Finally it presents the new plug-in to connect the Microsoft Office Communicator directly with a Cisco Unified Communications solution. This course does not include hands on labs and there is no follow up course related to Cisco Unified Presence technology.

Target Audience

The course is recommended for Presales Engineers and Network Designers who are responsible for the design of Cisco Unified Communications solutions.

Pre-Requisites

Delegates should meet the following prerequisites:

- ✓ Understanding of Cisco Unified Communications Manager deployments

Objectives

After completing this program, you will be able to:

- ✓ Explain the presence technology and solution
- ✓ Describe Cisco Unified Communications Manager Presence
- ✓ Design Cisco Unified Presence deployment solutions
- ✓ Describe Cisco Unified Presence interoperability and integration options
- ✓ Describe the Microsoft Office Communicator integration via Cisco UC Integration for MOC (CUCiMOC)
