BCM50 and BCM450 System Configuration and Maintenance (6046)

GK0621

Duration: 3 days

Overview

This course is designed for installation technicians and customer service representatives responsible for installing and configuring BCM50 and BCM200/400/450 systems. This course instructs you on how to install the BCM200/400/450 hardware and how to perform configuration and maintenance tasks on the BCM200/400/450 and BCM50 systems.

This course is taught at the BCM50 Release 3.0 BCM200/400 Release 4.0 and BCM450 Rls. 1.0 level. Note: BCM50 hardware installation content and messaging content is not included in this course. Course 6045C/X/T/W BCM50 Release 3.0 Installation Initial Configuration and Messaging is a prerequisite to this course. Course 6045C/X/T/W instructs you on how to install the BCM50 hardware perform initial configuration and configure messaging on your BCM50.

Pre-Requisites

Attendees should meet the following prerequisites:

✓ BCM50 and BCM450 Installation, Initial Configuration, and Messaging (6045).

Objectives

Upon successful completion of this course you will be able to:

✓ Describe BCM200/400 system hardware components;
✓ Install a BCM200/400 system;
✓ Configure Sets;
✓ Configure System Settings;
✓ Configure Services;
✓ Configure Restrictions;
✓ Monitor and analyze system status and performance;
✓ Perform system management tasks;
✓ Upgrade BCM software.

Target Audience

✓ Technicians and administrators.
