

Cloudera Essentials for Apache Hadoop

GK3903

Delivery Type: Classroom

Duration: 1 day

Overview

Learn the basics of Cloudera Apache Hadoop and how it can help manage your data.

In this course, you will receive an overview of Apache Hadoop and discover how it can help meet your business goals. You will cover the different Apache Hadoop technologies, including MapReduce, Hadoop Distributed File System (HDFS), Hive, Pig, HBase, Sqoop, Flume, and Hue, and you will learn how these fit into your existing technology environment.

Objectives

- ✓ Your business goals and Hadoop
- ✓ Fitting Hadoop into your existing environment

Target Audience

This course is suitable for Architects, Technical managers, CTOs and Engineering managers.
