HP-UX System & Network Administration I
H3064S

Delivery Type: Classroom

Duration: 5 days

Overview

This hands-on course is the first of two courses that prepare system administrators to successfully configure, manage, maintain, and administer HP-UX servers in a networked environment. Emphasis is on configuring file systems, peripherals, and user accounts, as well as managing and configuring core OS, patches, and application software. Successful completion of HP-UX System and Network Administration I and II will help in preparation for the HP-UX Certified System Administrator (CSA) technical certification. The 5-day course is 50 percent lecture and 50 percent hands-on labs using HP servers.

Pre-Requisites

Unix Fundamentals or equivalent experience 51434S

Objectives

✓ Install and manage HP-UX software and patches.
✓ Configure and manage disks using HPs Logical Volume Manager (LVM).
✓ Configure HP-UX kernel drivers, subsystems, and tunable parameters.
✓ Shutdown, boot, reboot HP-UX.
✓ Configure and manage peripheral devices and device files.
✓ Configure and manage file systems using HPs Journal File System (JFS).
✓ Backup and restore files and directories, and create a bootable recovery tape.

Target Audience

This course is designed for System administrators and others who install, configure, and maintain HP-UX servers.
