HP-UX System & Network Administration II
H3065S

Delivery Type: Classroom
Duration: 5 days

Overview

This course is the second of two courses that preparesystem administrators to successfully administer HP-UX servers in a networked environment. Successful completion of HP-UX System and Network Administration I and II will help in preparation for the HP-UX Certified System Administrator (CSA) technical certification. The 5-day course is 60 percent lecture and 40 percent hands-on labs using HP servers.

Pre-Requisites

✓ Configure LDAP servers and clients. H3064S
✓ Objectives
✓ Configure HP-UX TCP/IP connectivity.
✓ Configure custom HP-UX startup and shutdown scripts.
✓ Configure DNS servers and resolver clients.
✓ Configure NTP servers and clients.
✓ Configure LDAP servers and clients.
✓ Configure an SD-UX depot server.

✓ Configure HP-UX static and default routes.
✓ Configure NFS and AutoFS servers and clients.
✓ Configure telnet, ftp, remsh, rlogin, bootp, tftp, and other inetd services.
