

# HP Integrity Virtual Machine (VM)

HB506S

**Delivery Type:** Classroom

**Duration:** 2 days

## Overview :

This course covers Integrity server virtualization using the HP Integrity Virtual Machines (Integrity VM software). Experienced HP-UX administrators learn to fully use the flexibility of the Integrity VM software to maximize the resource utilization of their Integrity servers and develop the skills needed to install, configure, and manage Integrity VM. The two-day course is 50 percent lecture and 50 percent hands-on labs using HP servers.

## Pre-Requisites

- ✓ HP-UX System and Network Administration I and H3064S
- ✓ HP-UX System and Network Administration II or H3065S
- ✓ HP-UX System and Network Administration for Experienced UNIX® System Administrators and H5875S
- ✓ HP Partition Management and U5075S
- ✓ Familiarity with network concepts and configuration.

## Objectives

- ✓ Define the relationship between a VM host and VM guest.
- ✓ Configure, boot, monitor, modify and manage VM guests.
- ✓ Use the Virtual Machines Manager to monitor a VM environment.
- ✓ Relate the HP Integrity Virtual Machines software with other hardware and software components of HP's Virtual Server Environment.
- ✓ Install HP Virtual Machines software on a properly configured HP Integrity server.
- ✓ Boot the VM host.

## Target Audience

This course is suitable for HP-UX System Administrators with previous virtual partition experience and HP-UX System Managers.

## Follow on Courses

- ✓ HP Global Workload Manager HC719S
- ✓ HP Instant Capacity: iCAP, GiCAP & TiCAP or HC720S
- ✓ Consider attending the other courses in the HP Virtual Server Environment (VSE) curriculum to learn more about the HP-UX virtualisation.
