BladeSystem Administration for HP-UX
HC590S

Delivery Type: Classroom
Duration: 3 days

Overview :
In this 3-day course, students will learn how to successfully manage HP Integrity BladeSystem servers with HP-UX. This course focuses on system administration components rather than hardware deployment. The course introduces the BladeSystem enclosure, BladeServer models, BladeStorage models, Interconnect modules, HP Onboard Administrator, HP Virtual Connect and network storage solutions. It then highlights the HP BladeSystem c-Class server management using HP Systems Insight Manager. The course is 60% lecture and 40% hands-on labs using HP Integrity systems.

Pre-Requisites
✓ HP-UX System and Network Administration I & II (H3064S or H3065S)
✓ HP-UX System and Network Adminstration for Experienced UNIX® System Administrators (H5875S) or H5875S
✓ Equivalent HP-UX administration experience.

Objectives
✓ Discuss the management tools available for HP Integrity BladeSystem environments.
✓ Use Integrated Lights Out (iLO2) on Integrity Server Blades.
✓ Monitor the environment with HP SIM and SMH.
✓ Discuss the architecture of the HP Integrity c-Class BladeSystem components and their benefits.
✓ Use the HP BladeSystem Onboard Administrator.

Target Audience
This course is suitable for experienced software administrators responsible for managing and monitoring HP Integrity c-Class BladeSystems.

Follow on Courses
✓ HP Integrity Virtual Machine (VM) virtualization HB506S
✓ HP Systems Insight Manager HB508S
