

HP NonStop NB-series Server Operations Management Differences

HG767S

Delivery Type: Classroom

Duration: 3 days

Overview :

This course prepares you to operate and manage the new HP Integrity NonStop BladeSystem and introduces you to the new NonStop Multi-core Architecture (NSMA). Server configuration, operations, and networking are compared and contrasted between the S-series and NB-series servers. The 3-day course is a combination of lecture and live demonstrations using HP NB-series servers.

Pre-Requisites

- ✓ NonStop S-series Server Administration I (U5448S)
- ✓ AND
- ✓ NonStop S-series Server Administration II (U5449S)
- ✓ OR
- ✓ At least 6 months working experience on NonStop S-series server operational activities

Objectives

- ✓ Introduce you to the new HP Integrity NonStop BladeSystem including NonStop Multi-core Architecture (NSMA) and hardware components
- ✓ Provide an overview of networking CLIM and storage CLIM
- ✓ Identify system configurations
- ✓ Become familiar with the updates to Open System Management (OSM)
- ✓ Demonstrate operational differences between S-series and NB-series servers
