P9000 Performance Advisor 5.0
HK736S

Delivery Type: Classroom
Duration: 5 days

Overview

This course shows how to use the HP StorageWorks P9000 Performance Advisor Software product, version 5.0. It includes information about user tasks and array troubleshooting. Extensive notes and real-world tips are provided in the slide note-windows. This course is intended for users and HP service providers who are basically familiar with HP StorageWorks XP/P9000 disk array hardware, software, and storage systems. New version-5.0 features, as well as performance monitoring methods for both array types are discussed. Hands-on lab exercises are not included.
