

# Managing HP Storage D2D Solutions

HK766S

**Delivery Type:** Classroom

**Duration:** 2 days

## Overview

Managing HP Storage D2D Solutions introduces the D2D Disk Backup products, discusses the range of products in the product line, and explains D2D concepts, installation, and use. No labs are included, but the course includes walk-throughs of a number of important operations.

## Pre-Requisites

- ✓ Basic Windows administration experience.
- ✓ Basic understanding of SCSI, iSCSI, RAID, Fibre Channel, and SAN technologies.
- ✓ Objectives
- ✓ Explain the importance of Deduplication.
- ✓ Create Virtual Tape Libraries and NAS shares for use with disk backup programs.
- ✓ Perform basic troubleshooting and maintenance procedures.
- ✓ Describe important D2D product concepts.
- ✓ Configure D2D devices for initial use.
- ✓ Configure Replication between two D2D devices.

## Target Audience

This course is intended for D2D customers, HP Services field engineers, call center personnel, Presales and Channel Partners, and other field personnel who provide installation and/or operational support assistance for HP D2D Disk Backup devices.
