

HP Storage P9500 Differences for Experienced XP Administrators

HK767S

Delivery Type: Classroom

Duration: 2 days

Overview :

This two day seminar will cover the differences between the new HP Storage P9500 Disk Array and previous generation HP Storage XP arrays. Students will learn the hardware architecture and new user interface for the P9500.

Pre-Requisites

- ✓ An understanding of the architecture of the StorageWorks XP disk array.
- ✓ Objectives
- ✓ Understand the hardware architecture of the HP StorageWorks P9500 disk array.
- ✓ Understand the use of Thin Provisioning and the new P9000 Smart Tiers Software.
- ✓ Learn the changes to RAID Manager Software used for data replication.
- ✓ Use the new Remote Web Console 2 user interface to manage and view P9500 configuration information.

- ✓ Use the new integrated P9000 Command Line Interface for storage provisioning tasks.
- ✓ Become familiar with the new versions of Performance Advisor and Command View Advanced Edition required to manage a P9500 array.

Target Audience

This course is designed for storage administrators, with prior HP StorageWorks XP experience, who will be implementing P9500 solutions.
