

HP Matrix Operating Environment Infrastructure Administration

HK916S

Delivery Type: Classroom

Duration: 4 days

Overview :

This course covers the configuration and use of the HP Matrix Operating Environment infrastructure orchestration software to create an infrastructure service catalog and integrate into datacenter processes and services.

Pre-Requisites

- ✓ HP recommends that students have attained the following credentials or levels of experience before taking this course:
- ✓ Basic Microsoft Windows server management.
- ✓ HP Systems Insight Manager experience or training.
- ✓ Basic networking knowledge.
- ✓ Basic SAN knowledge.

Objectives

- ✓ Configure HP Matrix Operating Environment infrastructure orchestration (IO) software.
- ✓ Describe the IO workflow integration architecture.
- ✓ Process XML-formatted workflow inputs provided by IO.
- ✓ Create and manage a logical server through its lifecycle.
- ✓ Create, run, and publish a simple workflow in HP Operations Orchestration (OO) Studio.
- ✓ Describe the IO lifecycle integration interfaces.
- ✓ Install and customize a sample cloudmap that contains an IO template, an OO workflow, and several customization files.

Target Audience

This course is suitable for Administrators, engineers and consultants who will plan and manage internal cloud service catalogs using HP Matrix Operating Environment infrastructure orchestration software.
