

AppSense Professional

2.0 v8.4

ILT-DSK-100

Delivery Type: Classroom

Duration: 5 days

Version: 8.4

Overview

The AppSense Professional 2.0 course is a comprehensive administrator and basic troubleshooting course providing the necessary foundation to administer and maintain user virtualization solutions using AppSense DesktopNow. By combining focused lectures with scenario based hands-on exercises, students are empowered with the practical knowledge and skills needed to successfully perform AppSense DesktopNow administrative tasks, such as: Manage user behavior across multiple sites and platforms with policy and personalization; Manage user rights for corporate applications and network access control; Manage entitlement of system resources based on user, group and application; Perform basic troubleshooting.

Pre-Requisites

Before beginning this course, students should be familiar with Windows profiles and possess moderate to advanced Microsoft Windows administrative skills.

Target Audience

Customer administrators; New hire employees with little or no experience with AppSense DesktopNow; Channel partners and system integrators with little or no experience with AppSense DesktopNow.

Certification

This course contains the subject matter to prepare candidates for the AppSense Certified Professional 2.0 exam. For more information, please visit: www.dada.bg/certification
