

Foundation in IS Project Management

MPMF

Delivery Type: Classroom

Duration: 3 days

Overview

The course is highly practical and is based on experience developed in our own projects. Participants are encouraged to discuss their own problems and issues in project management and to identify how the skills taught on the course could benefit their own organisation. The course documentation provided for each participant includes a copy of the BCS/ISEB textbook Project Management for IT-Related Projects

Objectives

This course covers the syllabus of the Foundation Certificate in IS Project Management offered by the Information Systems Examinations Board (ISEB), the vocational qualification arm of the British Computer Society. The examination is a one-hour closed-book test with 40 multiple-choice questions; candidates must achieve 26 correct answers (65%) for a pass.
