

Implementing Advanced Telepresence Video Solutions Part 1 v1.0

PAIATVS1

Delivery Type: Classroom

Duration: 5 days

Overview

We recommend delegates to consider the TVS course which covers both PAIATVS1 and PAISTVS2.

This is a five day course designed to empower the partner with the capacity to install, configure, maintain, and troubleshoot a Cisco TelePresence network so that 80 percent of all field activity is unassisted.

Pre-Requisites

Attendees should meet the following prerequisites:

- ✓ Completed and passed the TelePresence Video Sales Engineer for Express eLearning and Exam 650-293 PATVSEE
- ✓ Completed and passed the TelePresence Video Sales Engineer for Advanced eLearning and Exam 650-296PATVSEA

Target Audience

This course is designed for installation and support engineers involved in the deployment, maintenance and troubleshooting of Cisco Telepresence solutions.

Certification

Recommended preparation for exam(s):

- ✓ 650-297 TelePresence Video Field Engineer for Advanced Exam
- ✓ Delegates should have also attended the PAIATVS2 course before attempting this exam

Objectives

After this program, you will be able to:

- ✓ Locate support documentation, and install, operate, configure, maintain, and troubleshoot the Cisco TelePresence Codec C90.
- ✓ Describe the call-control protocols, and install, configure basic registration capabilities for, and troubleshoot the Cisco TelePresence Video Communication Server (VCS).
- ✓ Locate support documentation, and install, operate, configure, maintain, and troubleshoot the Cisco TelePresence Multipoint Control Unit (MCU).

- ✓ Install, operate, configure, maintain, and troubleshoot the Cisco TelePresence Management Suite (TMS).

Follow on Courses

The following courses are recommended for further study:

- ✓ PAIATVS2- Implementing Advanced Telepresence Video Solutions Part 2
