

Replication Manager Workshop

REPMANWK

Delivery Type: Classroom

Duration: 5 days

Overview:

This workshop gives the student the opportunity to install, administer, operate, and troubleshoot Replication Manager v5.0. The focus will be on working with replications of file systems in the lab environment.

Replication of databases is not included in this course. The following courses cover database replication in Symmetrix environments:

Exchange Integration with Symmetrix
SQL Server Integration with Symmetrix
Oracle Integration with Symmetrix

Pre-Requisites

To understand the content and successfully complete this course, a student must have a suitable knowledgebase/skill set. The student must have an understanding of the following:

Replication Manager architecture, theory of operations found in the Impact module on SABA.
UNIX and Windows Administration
HP-UX, IBM AIX, Solaris UFS, NTFS, and VERITAS file systems
Symmetrix TimeFinder and SRDF
CLARiiON SnapView and SAN Copy

Objectives

- ✓ Upon successful completion of this course, participants should be able to:
- ✓ Install Replication Manager software
- ✓ Configure a Replication Manager environment
- ✓ Perform administrative functions using Replication Manager software
- ✓ Perform operational functions using Replication Manager software
- ✓ Perform basic troubleshooting in a Replication Manager environment

Target Audience

This course is intended for any person responsible for deploying, operating, or maintaining Replication Manager.

Certification

Assessments validate that you have learned the knowledge or skills presented during a learning experience. Completion of this course is based upon successful completion of the labs.
