

# RHCE Rapid Track Course

RH299

**Delivery Type:** Classroom

**Duration:** 4 days

## Overview

The RHCE® Rapid Track Course (RH299) is designed for senior Linux® system administrators who want to validate their competencies by earning the Red Hat® Certified System Administrator (RHCSA) and Red Hat Certified Engineer (RHCE) credentials. This is a fast-paced review course that combines the RHCSA Rapid Track Course (RH199) and System Administration III (RH254) courses—normally 8 days of training—into a single 4-day course. Building on the students' extensive knowledge of command-line-based Linux administration, the course moves very quickly through the intermediate and advanced tasks covered by lab-based knowledge checks and facilitative discussions.

By the end of this course, the senior Linux administrator student will have been exposed to all the intermediate and advanced competencies tested by the RHCSA and RHCE exams.

## Pre-Requisites

- ✓ Meet the requirements for attending Red Hat System Administration I, II, and III courses.
- ✓ Have the same skill set as an RHCT/RHCSA.

## Objectives

- ✓ Package management
- ✓ Network management
- ✓ Storage management
- ✓ Account and authentication management
- ✓ Installation, Kickstart, and virtualization
- ✓ SELinux and firewall management
- ✓ Web service
- ✓ Email service
- ✓ Network file-sharing services

## Target Audience

This course is recommended for an experienced Linux system administrator with at least 3 years of Linux experience who wants a fast-track solution to earn an RHCE certification and an experienced Solaris system administrator who's completed the Red Hat Enterprise Linux for Solaris Administrators (RH290) course.

This course is not recommended for students who have successfully completed the RHCSA Rapid Track Course (RH200). For those students, we recommend the Red Hat System Administration III (RH254) course.
