IBM Tivoli Monitoring Fundamentals
TM021G

Delivery Type: Classroom
Duration: 3 days

Overview

Learn how to use the Tivoli Enterprise Portal in IBM Tivoli Monitoring to manage your enterprise environment. You learn about the Tivoli Monitoring architecture and how to navigate the Tivoli Enterprise Portal. You also learn how to manage situation events, visualize real-time and historical data, manage user authorities, and publish monitoring workspaces. This course is appropriate for administrators and users of all Tivoli Monitoring products that use the Tivoli Enterprise Portal as the user interface.

Pre-Requisites

Students should be able to navigate Linux applications and have a working knowledge of an Internet browser.

Objectives

✓ Describe the Tivoli Monitoring architecture.
✓ Use and navigate the Tivoli Enterprise Portal to monitor and manage an enterprise monitoring solution built with Tivoli Monitoring.
✓ Manage the Tivoli Monitoring infrastructure by starting and stopping components, using the self-monitoring workspaces and topology, and building managed system groups.
✓ Build situations to monitor the enterprise.
✓ Access situation events, situation event details, and status changes.
✓ Manage events effectively using facilities provided with Tivoli Monitoring.
✓ Visualize enterprise monitoring data, personalize workspace data, and build workspace views.
✓ Manage historical data collection and use historical data within Tivoli Enterprise Portal.
✓ Manage user authorizations and user groups.

Target Audience

This introductory course is for operators and administrators responsible for their enterprise monitoring infrastructure. It is also intended to help new users of Tivoli Monitoring to use the tools to effectively manage their enterprise monitoring.
