

IBM Tivoli Endpoint Manager 8.1 Introduction

TP411G

Delivery Type: Classroom

Duration: 2 days

Overview

This course introduces the features and functions of IBM Tivoli Endpoint Manager 8.1. Topics include workflows and usage, functions to simplify and extend usage, and a high-level overview of the components, reporting tools, and methods for obtaining support. Through hands-on exercises, participants develop skills with the console, dashboards, and web reports.

Pre-Requisites

Students should have a working knowledge of Windows and Linux operating systems.

Objectives

- ✓ Describe how IBM Tivoli Endpoint Manager functions within an enterprise
- ✓ Receive foundation skills for additional training courses

- ✓ Learn to perform daily tasks through the IBM Tivoli Endpoint Manager Console
- ✓ Prepare a variety of standard management reports
- ✓ Practice behaviors within your scope of responsibilities that promote effective use of IBM Tivoli Endpoint Manager in your enterprise

Target Audience

This entry-level course is for operators, administrators, content developers, and implementers responsible for operating, and managing an IBM Tivoli Endpoint Manager environment.
