

NonStop Transaction Management Facility (TMF) Operations and Management

U4186S

Delivery Type: Classroom

Duration: 5 days

Overview

This course provides an intensive introduction to the HP NonStop™ Transaction Management Facility (TMF). You will learn terminology, components, and how NonStop TMF provides database protection. You will participate in lab exercises covering media management, audit and online dumps, volume and file recovery, catalog manipulation, configuration, routine operations, and how to prepare for orderly recovery. This four-day course is 60 percent lecture and 40 percent hands-on labs using HP servers.

Pre-Requisites

- ✓ NonStop S-series Server Administration I (U5448S) and NonStop S-series Server Administration II (U5449S);
- ✓ NonStop NS-series Server Administration I (U8528S) and NonStop NS-series Server Administration II (U8638S);
- ✓ Concepts and Facilities for NonStop Systems (U4147S) and System management experience on NonStop;
- ✓ K-series, S-series, or NS-series servers.

Objectives

- ✓ Recognize which system and software components are necessary for NonStop TMF to provide both minimum and full protection functions
- ✓ Plan, write, and execute a NonStop TMF configuration with and without file recovery
- ✓ Choose the appropriate values for the NonStop TMF configuration attributes based upon your particular needs
- ✓ Use the appropriate TMFCOM commands to perform routine maintenance on NonStop TMF objects

Target Audience

This course is suitable for Database administrators, System managers, System operators and Technical support analysts.
