

# Implementing Cisco Unified Communications 8.5 Features v8.5

UC85

**Delivery Type:** Classroom

**Duration:** 5 days

## Overview

v8.5 of Cisco's Unified Communications Manager has seen the introduction of several enhanced features and functionalities. This 5 day course is designed to provide learners with the knowledge and skills required to understand and implement the new features, as well as including information on the planning and migration to a virtual infrastructure deployment.

## Pre-Requisites

**Attendees should meet the following prerequisites:**

- ✓ Working knowledge of converged voice and data networks, [CVOICEV8](#) is recommended
- ✓ Working knowledge of Cisco IOS gateways
- ✓ Working knowledge of Cisco Unified Communications Manager, Cisco Unified Presence, and Cisco Unity Connection
- ✓ Prior attendance of [CAPPS](#) and [CIPT1V8](#) is recommended

## Target Audience

Channel Partners and engineers involved in the deployment of CUCM v8.5.

## Objectives

**After completing this program, you will be able to:**

- ✓ Describe the new features in Cisco Unified Communications Manager, Cisco Unified Communications Manager Session Management Edition, and Cisco Unified Communications Manager Business Edition variants
- ✓ Describe and configure the new Cisco Unity Connection functions, architecture, deployment, and redundancy options
- ✓ Describe and configure the new Cisco Unified Presence features, message compliance, federation, and calendaring
- ✓ Plan and deploy Cisco Unified Communications applications in a virtual infrastructure and migrate existing physical servers to a VM
- ✓ Describe the enhancements in Cisco Unified SRST and SRSV.
