

# VMware vCenter Orchestrator Develop Workflows v5.1

VMODW

**Delivery Type:** Classroom

**Duration:** 4 days

## Overview

This hands-on training course explores the use of VMware® vCenter™ Orchestrator™ for the automation of IT processes, both physical and virtual.

## Pre-Requisites

Knowledge of VMware vSphere  
Ability to script or program in JavaScript, Powershell, Perl, Java, Python, or similar languages

## Objectives

- ✓ Run the Orchestrator platform
- ✓ Use the Orchestrator client to import and run library workflows
- ✓ Develop and run custom parameterized workflows
- ✓ Design and develop reusable workflows

- ✓ Use VMware vSphere® API to automate various VMware® vCenter™ tasks
- ✓ Integrate Orchestrator into VMware vSphere® Web Client
- ✓ Integrate Orchestrator with external systems using plugins
- ✓ Document workflows
- ✓ Apply version control to workflows
- ✓ Export and package workflows

## Target Audience

Experienced VMware administrators, Automation and orchestration specialists, System integrators and Private and public cloud administrators.
