

VMware vCentre Site recovery Manager: Install, Configure, Manage v5.1

VMSRM

Delivery Type: Classroom

Duration: 2 days

Overview

This two-day, hands-on training course equips experienced VMware vSphere® administrators with the knowledge to install, configure, and manage VMware® vCenter™ Site Recovery Manager™ 5.1. This course also equips vSphere administrators with the knowledge to assist in writing and testing disaster recovery plans that use SRM.

This course is not required for any VMware® certification, but the content of the course is a subset of the knowledge tested in the VMware Certified Design Expert examination.

Pre-Requisites

- ✓ Completion of VMware vSphere: Install, Configure, Manage or equivalent experience
- ✓ Basic knowledge of disaster recovery concepts
- ✓ Basic knowledge of storage array technology

Objectives

- ✓ Install SRM 5.1
- ✓ Understand the storage replication options
- ✓ Deploy and configure VMware vSphere® Replication (VR)
- ✓ Configure inventory and resource mappings
- ✓ Build protection groups based on VR
- ✓ Create, edit, execute, and test a recovery plan
- ✓ Perform a planned migration
- ✓ Perform a reprotect and failback

Target Audience

vSphere administrators, architects, system engineers, and systems integrators who are responsible for the deployment or management of SRM
