VMware vSphere: Install, Configure, Manage v5.1
VSICM

Delivery Type: Classroom
Duration: 5 days

Overview
This hands-on training course explores installation, configuration, and management of VMware vSphere®, which consists of VMware vSphere® ESXi™ and VMware® vCenter Server™. The beta course is based on prerelease versions of ESXi 5.1 and vCenter Server 5.1. Completion of this course satisfies the prerequisite for taking the VMware Certified Professional 5 exam. Students who complete this course may enroll in any of several, more advanced vSphere courses

Pre-Requisites
System administration experience on Microsoft Windows or Linux operating systems

Objectives
By the end of the course, you should understand vSphere 5.1 functions and features and be able to:
✓ Install and configure ESXi

✓ Install and configure vCenter Server components
✓ Use vCenter Server to configure and manage ESXi networking and storage
✓ Deploy, manage, and migrate virtual machines
✓ Manage user access to the VMware infrastructure
✓ Use vCenter Server to monitor resource usage
✓ Use vCenter Server to increase scalability
✓ Use VMware vSphere® Update Manager™ to apply ESXi patches
✓ Use vCenter Server to manage higher availability and data protection

Target Audience
This course is designed for System administrators, Systems engineers and Operators responsible for ESXi and vCenter Server.
