

VMware vSphere with Operations Management: Fast Track

VSOMFT

Delivery Type: Classroom

Duration: 5 days

Overview

This intensive, extended-hours training course focuses on installing, configuring, and managing VMware vSphere® 5 and effectively using VMware® vCenter™ Operations Manager™. This course combines the content of the VMware vSphere: Install, Configure, Manage course with the vCenter Operations Manager: Analyze and Predict course.

Pre-Requisites

System administration experience on Microsoft Windows or Linux operating systems

Objectives

By the end of the course, you should understand vSphere 5.1 functions and features and be able to meet the following objectives:

- ✓ Install and configure ESXi
- ✓ Install and configure vCenter Server components

- ✓ Use vCenter Server to configure and manage ESXi networking and storage
- ✓ Deploy, manage, and migrate virtual machines
- ✓ Manage user access to the VMware infrastructure
- ✓ Use vCenter Server to monitor resource use
- ✓ Use vCenter Server to increase scalability
- ✓ Use VMware vSphere® Update Manager™ to apply ESXi patches
- ✓ Use vCenter Server to manage higher availability and data protection
- ✓ Understand major and minor badges and their underlying metrics
- ✓ Use these badges to find the root causes of common operational problems in a vSphere environment

Target Audience

- ✓ System administrators
- ✓ Systems engineers
- ✓ Operators responsible for ESXi and vCenter Server
